Document Overview

What is DIAMD?

The Digital Identity & Access Management Directory (DIAMD) is the identity and access management platform for users of the Office of Justice Programs (OJP) systems, including NamUs. DIAMD provides a secure environment where users may request access to NamUs and maintain accounts protected with advanced security features such as multi-factor authentication (MFA) and Single Sign-On (SSO).

What is MFA?

Multi-Factor Authentication (MFA) is a security method that requires a user to enter more than one form of verification to confirm their authentic identity. For example, in addition to a correct password, a system that uses MFA could also ask the user to enter a unique passcode that they receive via text or email.

What is SSO?

Single Sign-On (SSO) is an authentication process that allows users to access multiple systems using only one set of login credentials. By offering an SSO solution for the Office of Justice Programs (OJP) systems, DOJ reduces the number of login and password combinations you need to remember.

NamUs Registration

User Registration

Select your user type:

☒ Public User

☐ Professional User

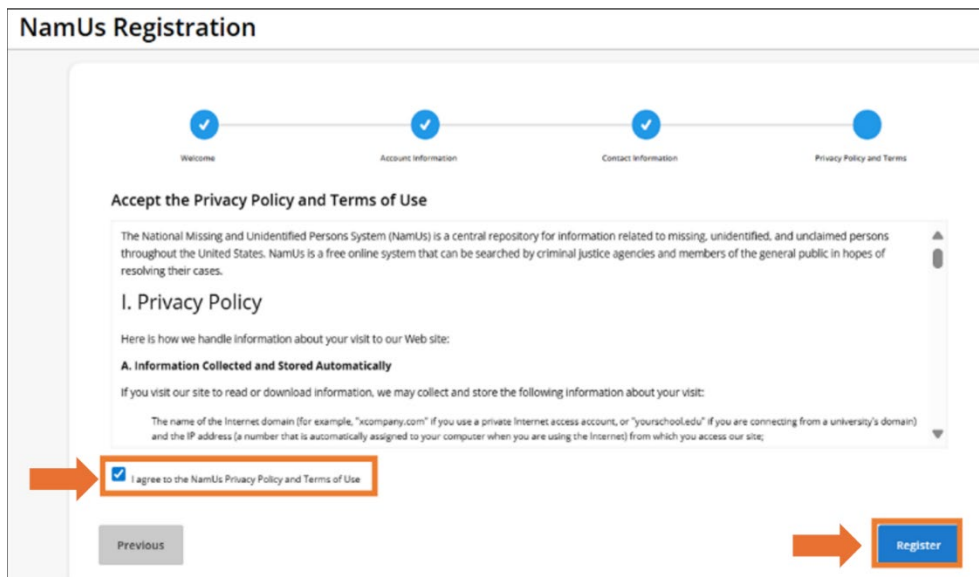

Registering as a Professional User will require criminal justice agency approval

Public User include family members of missing persons, victim advocates, media representatives, and other members of the general public who are registered users of the NamUs system. Registering as a Public User allows one access to enter new missing person cases or contribute relevant information to NamUs staff, which will be vetted with the investigating agency prior to publication in the system, as well as provides the user with permission to view and search non-sensitive information in NamUs.

Professional User include law enforcement officers, medical examiners, coroners, missing person clearinghouse personnel, and other allied professionals. Professional User registration requires sponsorship from a criminal justice agency, and once vetted, the user will be granted heightened permissions within the NamUs system, as appropriate; to access secure information, manage agency cases, and network with other criminal justice professionals.
